PROFESSIONAL SUMMARY

Senior Developer with extensive experience in **Node.js**, **React**, and **Angular**. Skilled in leading complex projects and building high-performance, user-friendly applications. Strong background in team management, the software development lifecycle, and delivering tailored solutions.

TECHNICAL SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, TypeScript
- **Frontend:** React, Redux, Angular, Next.js, SASS
- **Backend:** Node.js, REST API, GraphQL, MongoDB
- **Tools & Platforms:** Git, GitHub, Jira, Trello
- **Development Practices:** Agile, CI/CD, Performance Optimization, Responsive Design
- **Testing & Quality Assurance:** Unit Testing, Automated Testing, Cross-Browser Compatibility

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer

Tkxel | May 2024 – Dec 2024

Signal Project

- Engineered and deployed a highly optimized product Signal website using **React**, **Redux**, **Node.js**, **JavaScript**, and **TypeScript**.
- Collaborated with cross-functional teams and UX designers to refine user experience across various devices.
- Enhanced performance and reliability through lazy loading, caching, and error handling.

CFNL Project

- Developed a scalable solution using **React**, **Redux**, **Node.js**, and **TypeScript**.
- Implemented Axios and Fetch API for asynchronous HTTP requests, improving error handling and cleaner code.
- Utilized **React** state management and Redux for efficient API data flow.

ProPM Project

- Developed and integrated the ProPM application using reusable components to maintain scalability.
- Mentored a team of 5 developers using **Agile** methodologies, ensuring timely project delivery and code quality.

Software Engineer

Tkxel | April 2021 – April 2024

Measure Project

- Integrated **Google Maps API** for custom polygons and flight plans in a React-based product.

Bridge Corp. Project

- Developed the **Admin** and **User Modules** for campaign and task management in React.

Swisse Project

- Developed multiple modules for **VueJS** applications and integrated APIs.
- Implemented **CI/CD** pipelines for automated testing and deployment.

Associate Software Engineer

Luminogics | Oct 2019 – March 2021

Staples Project

- Developed UI features using **ReactJS** and integrated APIs.

SO.AI Project

- Developed a cross-platform snipping tool using **ReactJS** and **Electron**.

Pepsi Ecommerce Project

- Managed frontend team and integrated APIs for the Admin Panel in **ReactJS** for the **Pepsi** ecommerce solution.

Aquafina Bulk Delivery Project

- Developed backend services using **NodeJS**, **GraphQL**, and **MongoDB**. Managed backend team and integrated APIs.

EDUCATION

BSCS

Punjab University College of Information Technology | Graduated 2019
